

GLOBAL HI-TECH MANUFACTURER

Introduction of a new cCMS

SCOPE

- // Time reduction for content search in multiple authoring systems and individual files
- // Significantly reduce time spent post translation to reassemble and proof documents
- // Implement managed workflow and version control for reviews and approvals

SOLUTION HIGHLIGHTS

- // Identified and implemented a single component content management system (cCMS)
- // Implemented automated quality check for language rules to reduce editing
- // Optimized DTDs & style sheets to minimize post publishing amendments for all languages
- // Standardized authoring workflow with reviews and feedback managed within a PDF viewer

BUSINESS VALUE DELIVERED

- // Cost savings of over \$6M over 5 years for development of product information
- // Implementation and content migration delivered ahead of schedule and under budget
