

IoT SOLUTION FOR A LEADING HOME AUTOMATION COMPANY

SOLUTION

- // A leading thermostat major was losing market share due to lack of differentiation.

LTTS helped the OEM engineer a new age product line.

FEATURES

- // Smart Connected Thermostat leveraging IOT, Cloud & Mobility solution using LTTS' UBIQWeise platform.
- // Smart remote control all aspects of indoor air quality.
- // Humidifier/Dehumidifier Control
- // Outdoor Temperature indication
- // Compliant to Industry and Security Standards
- // Firmware upgrade over Wi-Fi
- // API for easy integration with other internal / external systems.
- // Scalable architecture with AWS

BUSINESS VALUE DELIVERED

- // 10% improvement in the segment market share of the home automation OEM
- // ROI to end customers in 1-3 years due to energy savings
