# Global Macro Environment Driving Short Term ER&D Trends

## Global Trade in a Flux

leading to supply chain rejigging and global sourcing diversification

## Euro Defence Spending<sup>#</sup>

Europe's defense spending to reach additional \$370B if nations commit 3.5% of their GDP

## Data Centers<sup>^</sup>

Global investment in data centers has nearly doubled since 2022 and amounted to half a trillion dollars in 2024

## World thinking of AI<sup>&</sup>

Global AI capex spend to grow by 60% this year to \$360B, and by another 33% in 2026 to \$480B

## India 4<sup>th</sup> Largest Economy

With a strong tech push, massive digitally skilled talent pool, and rapid growth; India is emerging as a top ER&D hub

## R&D Spend<sup>\*</sup>

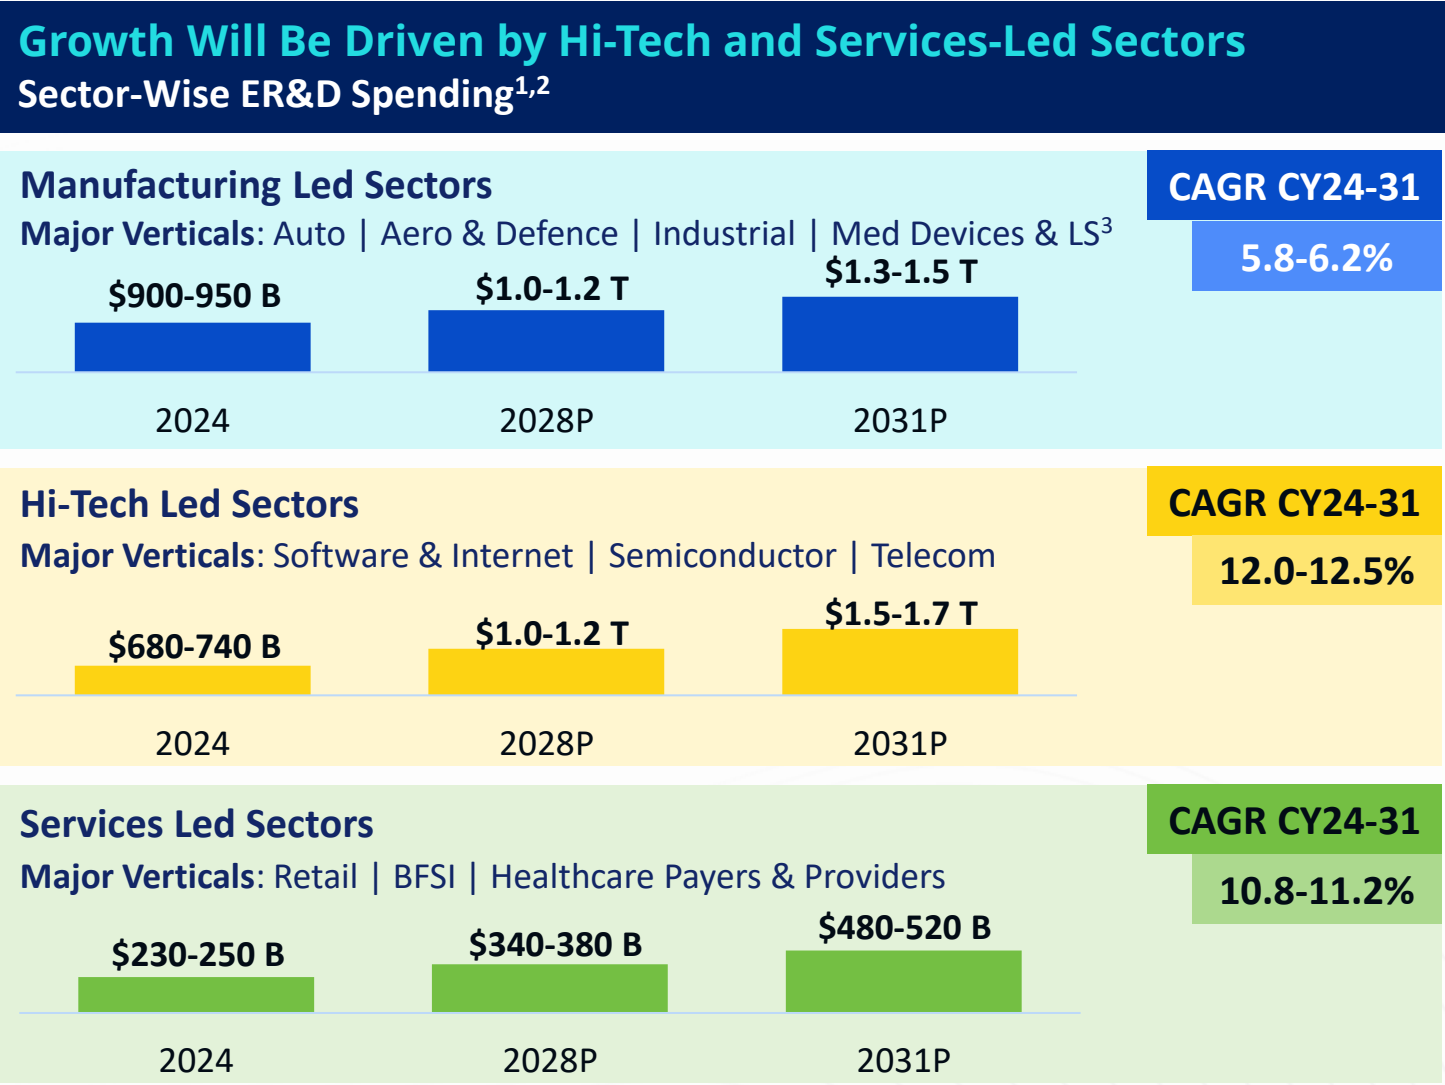

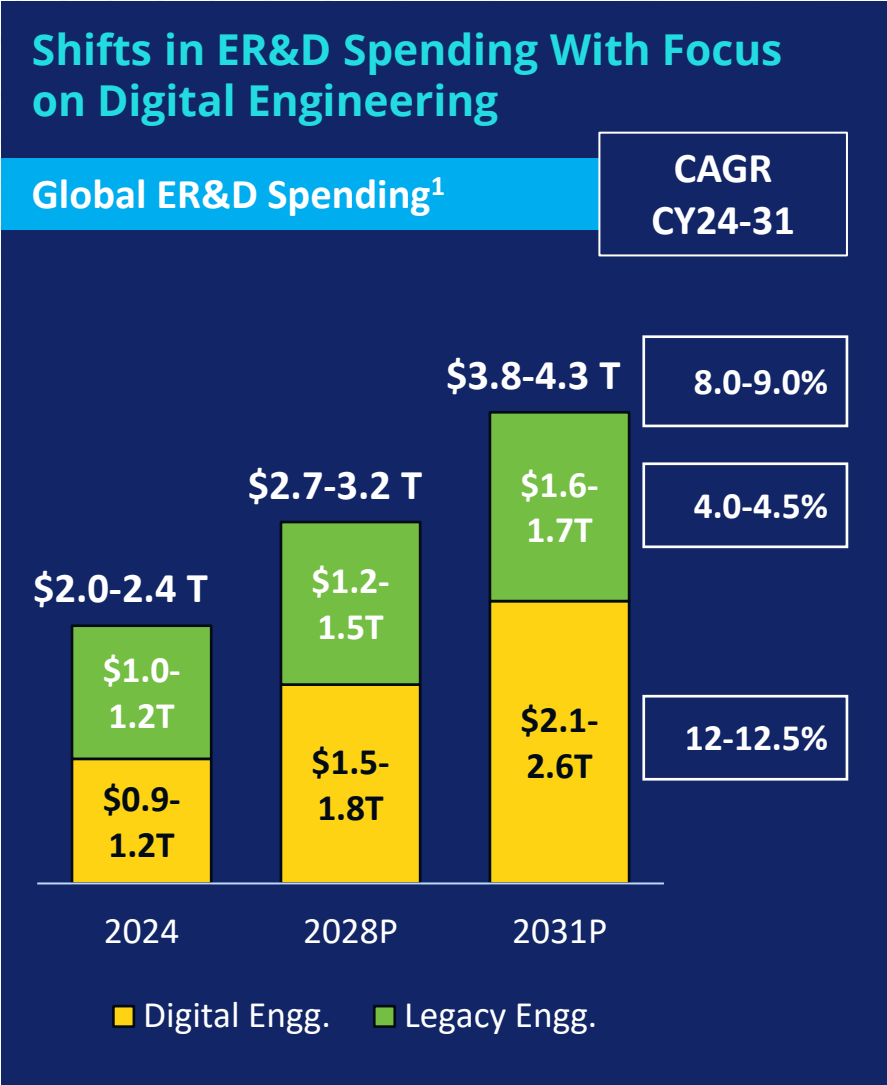

ER&D growth at 4-5% CY25E due to macro & geopolitical factors

## Seismic Shifts

### Advances in AI

Agentic AI, Rise of AGI, and AI in programming & synthetic data

### Demographic Shifts

Aging societies face labor shortages. It also drives geopolitical & economic policies

### Technology Developments

Artificial Superintelligence, Streaming intelligence, Exascale and Synthetic Prototyping

### Government Policies; WIIFM

Nations adopt transactional, self-interested policies based on immediate gains over global cooperation

### Connectivity, Compute and Energy Affordability

Democratizing access to innovation

## What it Means for Our Segments

### Mobility

- **Fuel Cell Electric Vehicles and Hydrogen Fuel** as alternative to EVs and ICEs
- **Autonomous Delivery, Micro EV fleet & Humanoid Robo** new business models
- **Robotics powered by AGI** to transform labor and economic output
- **US Auto Industry is in a managed decline**
- **Space and Defence** spending will increase
- **Full-stack manufacturing** will return as robotics and EVs demand tighter integration

### Sustainability

- **'Electrify Everything' vs 'Deep Decarbonization'** central to strategy
- **Molecule Based Energy Systems** seen as more scalable cost-effective
- **Power-to-Gas and Hydricity** as viable energy frameworks
- **Fuel Cells:** Energy conversion, replacing ICEs in various applications
- **Building Machines that Build Machines**, embedding intelligence into products
- **Industrial Automation** will accelerate

### Tech

- **On-device Content Generation** may disrupt broadband infra
- **Decentralized AI Compute** as inference infra move from cloud to edge
- **AI Self-Integration** with enterprise systems
- **Venture capital** will fuel a new wave of industrial innovation
- **'Medical Superintelligence'** to shape BioTech and personalized Pharma
- **Autonomous & Predictive Urban Management** with AI-IoT integration

# LTTS Growth Ambition: \$2B Topline with Billion-Dollar Segments

# Driving Growth with Large Deals Momentum

## Higher Addressable Market

- **Shortening technology cycles** and need for faster speed-to-market and optimal cost structures
- **Investments in New age technologies** leading to deeper partnerships with customers
- **New Segment strategy** for faster decision making and deeper domain expertise

## Improve Win Ratio

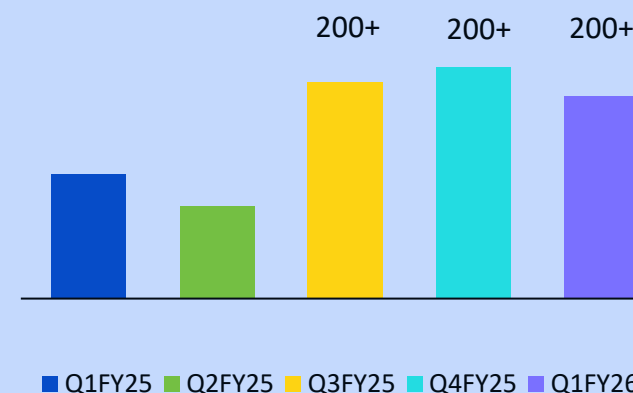

- **Track record** of large deal execution in ER&D
- **End to end capabilities** to support entire product lifecycle
- **Domain expertise and Cross-Poll!novation** to bring out customized solutions and accelerators

## Pipeline and Deal Size

- **Q1FY26:** Third consecutive quarter of USD 200+ Mn large deals TCV

### LD TCV(\$ Mn)

# Strengthening Operational Playbook for Margin Improvement

## Increase Customer Mining

- Large-scale deals to deepen strategic customer engagement
- Dedicated G45 leadership driving proactive, cross-functional solutions

## Delivery Led Growth

- Revenue mix shifting toward high-margin, tech-enabled solutions

## Pyramid Rationalization

- Fresher hiring to reinforce pyramid efficiency and future-ready workforce through Global Engineering Academy

## Higher Offshoring

- Accelerate offshore-led initiatives to unlock cost and scale advantages
- Targeting 300–500 bps improvement in offshore ratio

## AI & Automation

- Promote the adoption of Artificial Intelligence across LTTS and its customer base
- Accelerate innovation and solutions dev. and gain competitive advantage

## Maintain SG&A as % of Revenue

- Strengthen domain-led sales capabilities
- Drive G&A efficiency through scale optimization

# Augmenting Talent – OARS Organization

- Time-bound fresher hiring roadmap

## Fresher Hiring Strategy

- Enhancing Engagement, Efficiency and Accessibility

## Digital HR

- Fostering Leadership and employee participation

## CSR

Shaping new-age mobility

# Enabling Autonomous Drive

## THE CHALLENGE

The client sought level 3+ autonomy of cars and design and develop a slew of autonomous drive features to improve safety and driving experience while achieving a faster time to market.

## WHAT WE ENABLED

- Level 3+ autonomous features including Redundant Braking System, Emergency Stop Functionality, and Parking Assistance Feature.
- Vehicle dynamics software test for emergency stop functionality and redundant brake controller (RBC)
- Virtual validation platform with Scenario creation for testing was enabled
- **Faster time to market** achieved through ~ 40% automation in scenario creation and testing.
- Complete Functional & passenger safety compliance as per standard norms (ISO26262)

## OUR EDGE

- Hardware in Loop (HiL) testing and development capabilities
- Our capability of Virtual validation platform development

## Minimizing Shop-Floor Downtimes

# AI-enabled, Scalable, Streamlined

### THE CHALLENGE

Our client, an USD 50 Billion+ petrochemical giant sought to reduce **unscheduled asset downtime** by modernizing legacy systems, integrating advanced diagnostics, and eliminating data silos for enhanced efficiency

### WHAT WE ENABLED

- Creating an **AI advisory system with ML anomaly detection** models that enables and identifies variables to detect anomalies that utilize live, historical, and contextual data to provide expert insights
- **Scalable cloud-native framework** for fast, customizable data pipelines with loosely coupled jobs/services for independence and reusability
- **Action Tracking Workflow** - Records all steps from alarm to resolution for downtime events and provides sensor-based classifiers for alerts

### OUR EDGE

- World renowned **AI-based predictive maintenance solution - AHF Framework**
- In-depth domain expertise in Plant Engineering
- Extensive expertise across industrial and factory automation

## Streamlining Healthcare Journeys

# AI-enabled, Scalable, Streamlined

### THE CHALLENGE

The client, one of America's **largest healthcare conglomerates**, sought an **end-to-end IoT solution** which enabled a **seamless, interconnected network** that enables surgeons in their workflow and patients on their healthcare journey

### WHAT WE ENABLED

- **End-to-end design and development** of a unified, cloud-based surgical platform capable of integrating diverse and sophisticated technologies, managing vast amounts of diverse device data while meeting the specific needs of different stakeholders across the value chain.
- The platform is also equipped with an **enhanced edge security**, preventing unauthorized access and ensuring data integrity and confidentiality while maintaining strict compliance with safety regulations and standards

### OUR EDGE

- Deep domain expertise in helping customers across **digital transformation journeys**
- 30+ years of experience in the MedTech domain

**Purposeful.  
Agile.  
Innovation.**

## **ABOUT L&T TECHNOLOGY SERVICES**

L&T Technology Services (LTTS) is a global leader in engineering and technology services. A listed subsidiary of Larsen & Toubro (L&T), we offer design, development, testing, and sustenance services across products and processes.

**Purposeful. Agile. Innovation.** is how we drive growth across the Mobility, Sustainability, and Tech segments. Our customer base includes 69 Fortune 500 companies and 57 top ER&D companies across industrial products, medical devices, transportation, telecom & hi-tech, and process industries. Headquartered in India, we have over 23,600 employees across 23 global design centers, 30 global sales offices, and 105 innovation labs, as of June 30, 2025.
